DETAILED ACTION

1. This action is responsive to the Applicant's response filed 11/10/09.

As indicated in Applicant's response, claims 8, 13, 24, 39 have been amended, claims 1-7, 9-11, 19-23, 26, 34-38, 41 canceled and claims 49-50 added. Claims 8, 12-18, 24-25, 27-33, 39-40, 42-50 are pending in the office action.

EXAMINER'S AMENDMENT

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.
3. Authorization for this examiner's amendment was given in a telephone interview with William Egan III, Reg. # 28,411 on 12/15/09.

The application has been amended as follows.

In the **CLAIMS**:

The claims have been amended according to the herein attached Amendment, namely, "Claim Amendment for Enabling Examiner's Amendment", provided as file "AmendM_121809.pdf"

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

4. Claims 8, 12-18, 24-25, 27, 30-32, 39-40, 44-47, 49-50 are allowed.

The following is an examiner's statement of reasons for allowance.

The prior art taken separately or jointly does not suggest or teach the following features.

A monitoring system including a central server computer in communication with a plurality of remote casino site computers, including a first computer at each of such sites, the system comprising: (i) central computer's message receiver to receive message that identifies the first site computer as the sender, a tester at the central computer configured to determine, in response to receiving, if a value included in the message is acceptable, (ii) the tester provided with a plurality of filters each defining a range of acceptable values, where the range of values of a (chosen) filter are used by the tester to compare with the first value such that the central computer would display an alert regarding non-acceptability of the metric received from the first site computer; (iii) wherein the first computer's site is a casino site, and equipped with a software to operate a probe, the probe configured to determine at predetermined time intervals, information and value of a metric relating to applications running at the first computer, and transmit a message including the metric and site related information to the central computer; as recited in claims 8, 13, 24, 39.

Cravo de Almeida et al, USPubN: 2002/0169871, discloses a remote monitoring of local sites where STMP messages communicated back to a monitoring server include the information collected at the remote sites for assessment, wherein information gathered includes information of the running platform and CPU usage for which determination of resources exceeding a threshold would generate a administrative warning. Cravo, however fails to teach or suggest casino site first computers equipped with probes to operate at intervals as in (iii) where value for a metric collected by the probe at given site is sent (via message) for evaluation by a central computer structured in a NW topology as in (i), using plurality of filters as in (ii).

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
